

# Looking for the Future?

**BROSSH**  
Inspection Systems Ltd.

# BROSSH Provides Automated Inspection Solutions Today!

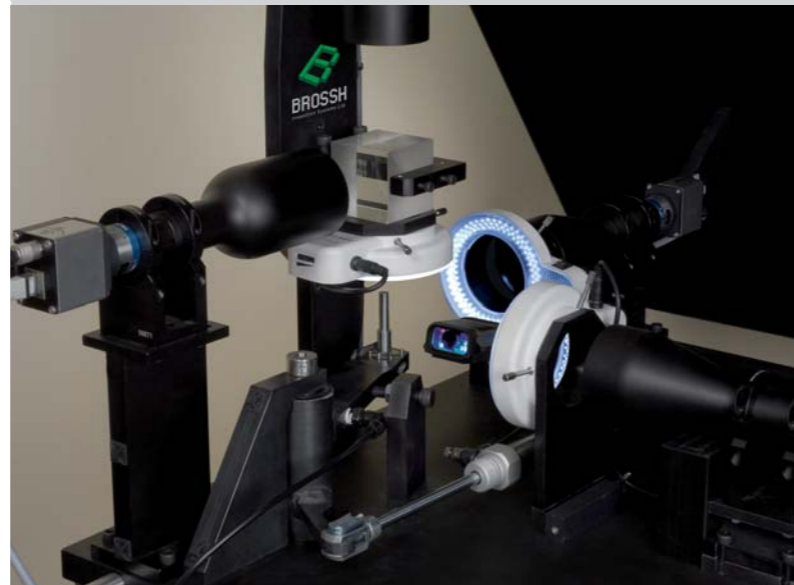

## BROSSH Product line

### bVISION Engine

A software package for generation of Machine-Vision application.

#### Features:

- Non-contact visual inspection, using CCD cameras
- Critical dimension measurement
- Defect inspection
- Inspection reports and SPC
- System integration with the factory floor
- Integration with Servo motors, I/O, TcpIp, Rs232 & Robots

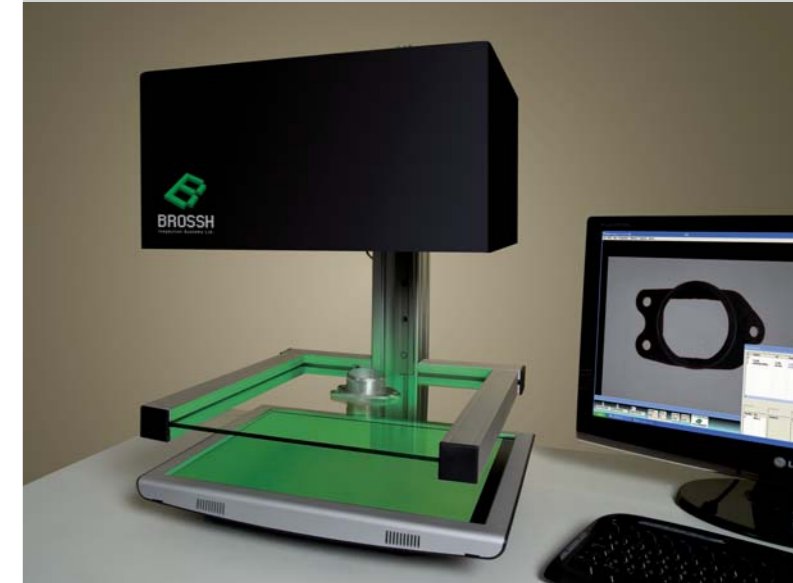

### bVISION Comparator

Computerize comparator for high accuracy and fast measurement.

#### Features:

- Telecentric Optics for maximum accuracy
- Colored Back Light illumination, allowing inspection of transparent parts at different colors
- High resolution camera and subpixel algorithms, for maximum measurement accuracy
- Based on our **bVISION Engine**
- Scalable optics, suited to customer needs

# BROSSH

## Inspects Your Product for Better Yield

### bVISION Robotics

bVISION Robotics is a robot arm used for scanning 3-dimensional objects, where measurements and defect inspection are needed.

The flexible 3D measurement tool is an integration of the bVISION Engine and Robots.

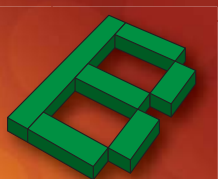

The machine was designed for simple inspection recipe setup, enabling the user to teach the tool a set of inspection views. A vision task can be set up for every view, resulting in 3D inspection.

**Brosch Inspection Systems** Ltd. specializes in Machine-Vision solutions for quality control and hands-free geometrical measurements in industrial applications. The company offers various quality control solutions, using Computerized Image Processing. The company specializes in applications in which an accurate inspection and/or selection of products is required.

Using our **bVision Engine** you can build a complicate machine vision application in a minutes, and also to integrate Servo motors, Robots , I/Os and communication with other devices.

The company's main goal is to offer high standard, tailored system solutions for the various applications. This is carried out with the highest levels of professionalism, service & support, as well as competitive prices.
